FIRE DEPARTMENT
WATER DIVISION

July 18,2022

Last week, the State of Connecticut's Interagency Working Group issued a water conservation request as part of a "Stage 2" drought declaration.

While water conservation is always prudent, The Cromwell Water Division has no mandatory water restrictions being placed on its customers.

We do ask that you voluntarily take the following measures to aid in minimizing future drought impacts.

- Reduce automatic outdoor irrigation
- Postpone the planting of any new lawns or vegetation
- Minimize overall water use by fixing leaky plumbing and fixtures

The Water Division will continue to monitor the drought and its impact on our water supply and advise customers when conditions warrant any water restrictions in our service area.

Joseph Palmieri
Water Operations Manager
